Improvement Plan

Participants to the “Promoting networking in the development of linguistic skills in connection with the European Language Label” NELLIP National Workshops did not focus on a specific language project or initiative, stressing its strengths and weaknesses.

Participants preferred a more general overview and discussed a general strategy to be carried out in order to analyze how networking can be helpful in disseminating and exploiting language teaching and learning projects/initiatives. For each problem identified, participants proposed the best possible solutions to be shared with NELLIP portal end users.

This is the improvement plan as result of the workshop’ activities:

Problem identified	Proposed solution
Education providers and experts tend to be “jealous” with reference to the outcomes they reached	Networking means: <ul style="list-style-type: none"> • To open a window to the world • To feel part of a community and to share its vision of the world • To transfer the acquired know-how • To promote the cultural aspects of language learning

Poor dialogue between institutions, headmasters, teachers, etc...	Networking helps to: <ul style="list-style-type: none">• To promote synergies between different institutions• To analyze and implement existing models• To ensure ongoing improvement of existing training models
Copyright related issues with reference to language teaching initiatives and projects	<ul style="list-style-type: none">• To promote the information about specific intellectual property right issues at European level
