

Group report: project proposal

BE FASHIONABLE AND PROTECT YOUR PLANET

Objectives:

To improve students' communicative competence in foreign language.

To develop social skills (students learn how to communicate with their peers from other countries, develop intercultural competence).

To develop creativity and critical thinking (cross curricular approach (CLIL), being trendy means not necessarily buying new and expensive things but possibility to use old things and waste in the original way).

To raise awareness of environmental issues (to change attitude towards excessive consumption, learn how to survive using less).

Outcomes:

Students' improved language and communication skills;

Students' developed ICT, Art and Design skills;

Changed students' habits of using things around them;

Strengthened relations between students and parents, cooperation between school and community;

Target group:

secondary school students

parents

school community

Partners:

Environmental organizations

Schools from other EU countries

Business

Project planning:

Result:

Fashion show from the recycled and waste materials in project countries for wider public

Activities:

To learn special vocabulary during foreign language lessons

To model/create clothes during Art and Design lessons

To produce clothes during Technology lessons

To get acquainted with the environmental problems, solutions and ways how to protect the planet

To download the produced materials on line and vote for the best models

To instruct (on line) partners how to produce models from waste.
